

International Preceptorship Program at Broward Health

Clinical Area: Oncology (Breast & Lung Cancer)

COMPETITIVE GRANT PROGRAM FROM PFIZER GLOBAL MEDICAL GRANTS

Overview

Broward Health is one of the 10 largest public healthcare systems in the United States, located in Fort Lauderdale, Florida. It is a renowned institution for cancer care, and is proud to lead the Preceptorship for Breast/Lung Oncologists from Latin America.

Goals

The overall goal of this program is to increase the knowledge and competency of early career oncologists in relation to the management of breast cancer and lung cancer patients. Specifically, patients with advanced or metastatic breast cancer or non-small cell lung cancer. The program will achieve this by addressing cancer care as a process that is also influenced by access to care, health and general literacy, stigma, psychological, social, and other emotional factors.

Key Objectives

- *Increase awareness and understanding of recent research developments and mechanisms.*
- *Learn about screening, diagnosis, and staging of breast and lung cancer.*
- *Study the biology of these specific cancers and its implications in the management of this disease.*
- *Conduct and use genetic testing to guide treatment decision making.*
- *Determine the standard for care of early, locally advanced, and metastatic cancer in surgery, radiation therapy, and systemic therapy.*
- *Focus on the importance of treating patients based on the timely results of molecular testing and improving management of adverse events of biomarker-driven therapies in order to optimize patient outcomes.*
- *Understand and demonstrate the crucial role of multidisciplinary care in the management of breast and lung cancer.*
